EDUCATION

➤ Masters in Computer Science and Business Management

ISCTE
2023 - 2025

➤ Programing Course

42 Lisboa
2023

➤ Bachelor in Management Informatics

Universidade Autónoma de Lisboa
2019 - 2022

CERTIFICATIONS

➤ Foundations of Project Management

Google
2023

➤ Deploy a website to Azure with Azure App Service

Microsoft
2023

➤ Introduction to software testing

University of Minnesota
2023

SKILLS

- Performance optimization
- Critical Thinking
- Cross-functional Collaboration
- Problem-solving
- Emotional Intelligence

I'm a Software Engineer with a passion for working across all aspects of web development, with experience in consulting and startup environments. I enjoy challenges and thrive in dynamic setups, bringing an adaptable and collaborative spirit to the teams I work with. I'm driven to expand my knowledge and master diverse technologies in an ever-changing environment.

WORK EXPERIENCE

➤ IT Fullstack Developer | Skypro 2025 - Present

- Serving as the primary technical owner for the front-end architecture of the new mySkypro project, defining the UI/UX strategy and ensuring its scalable implementation using React.
- Developing end-to-end features across the stack with .NET and React within a monorepo environment, ensuring seamless integration between the frontend and RESTful APIs.
- Acting as the most senior in-house developer, providing guidance and conducting code reviews for teammates to ensure alignment with best practices and architectural standards.
- Managing server infrastructure and deployments via ClaraNet, including the setup and optimization of CI/CD pipelines to automate the software delivery lifecycle.
- Leveraging AI-driven development workflows, specifically Cursor, to accelerate coding velocity, technical documentation, and the delivery of complex features.

➤ Software Developer | FakeDoor 2023 - 2024

- Contributed significantly to the product launch and developed 450+ Unity models for WebGL, emphasizing interactivity and responsive user feedback.
- Streamlined end-to-end workflows across 7 departments, improving operational efficiency by up to 85%.
- Utilized Git on Bitbucket, managing branches, commits, and conflicts for cohesive code history.
- Collaborated with various teams, including design, frontend, and backend development, ensuring cohesion and effectiveness in projects.

➤ Fullstack Software Engineer | BI4ALL 2022 - 2023

- Integrated the Workflow Management API into the Employee Portal, amplifying its functionalities and providing a unified platform.
- Identified and resolved system bottlenecks, ensuring optimal performance and responsiveness to user interactions within the Employee Portal.
- Responsible for the creation of new features within the Employee Portal, elevating the overall user experience and engagement.

TECHNICAL SKILLS

- **Languages:** C#, .Net/.Net Core, JavaScript, HTML, CSS, Python, C/C++, Shell, Java
- **Frameworks:** ReactJS, ThreeJS, TailwindCSS, Framer, Bootstrap, NodeJS
- **Databases:** Microsoft SQL Server, PostgreSQL, MySQL,
- **Tools:** Unity, Jira, Bitbucket, GitLab, Confluence, Visual Studio, Visual Studio Code, SQL Server, Management Studio, Azure Data Studio, Office, pgAdmin, Azure DevOps, mRemoteNG, Postman, PHC
- **Methodologies:** Agile, Scrum
